

## Enabling Cookies – PC – Mozilla Firefox

**Step 1:** Go to the Menu Bar and select the drop-down tab labeled “**Tools**”. At the bottom of the “**Tools**” tab, select the “**Options...**” tab.

**Step 2:** A new “**Options**” window will appear with the tabs “**General**” through “**Advanced**” present. Click on the “**Privacy**” tab (third from the left). At the top of the “**Privacy**” box, there will be a “**Firefox will:**” dropdown screen with the options, “**Remember history**”, “**Never remember history**”, and “**Use custom settings for history**”. Click the “**Use custom settings for history**” option.

**Setting 3:** Under the option for “**Use custom settings for history**”, a number of boxes will become available. Make sure the box labeled, “**Accept cookies from sites**” is checked. Click OK, and cookies are now enabled.
